

# Pillow & Bladder Tanks

## Potable Water

### OVERVIEW

With welded seams for durability and a design to make it easy for one-person handling, you'll get years of practical water management with a water bladder tank from Fol-Da-Tank.

Potable water fabric versions are made to the NSF/ANSI 61 standard. A four-inch-diameter fill opening speeds filling. The tanks are small enough to transport by pickup truck so you can quickly get a range of useful volumes of water in or out of virtually any location safely.

Fol-Da-Tank pillow and bladder tanks are high-quality, durable water bladder tanks which provide drinking water storage in an inhospitable location and is a super-mobile water supply. Fol-Da-Tank highly portable pillow tanks are versatile, with applications for clean showers for firefighters, emergency drinking water and much more.

### CONSTRUCTION FEATURES

- Nineteen standard sizes are compact & easy to store
- Fabric resists chemical contamination, mildew, rot and solar heat
- Fills and empties in minutes by pump or gravity flow

Part No. Potable Water	Volume US gal/liters	Filled Dimensions in/m (L x W x H)	Weight lb/kg
PW-25	25/95	24"x36"x8"/0.61x.91x0.2	10/4.5

### FEATURES

- Potable water fabric NSF/ANSI 61 standard
- Compact — easy to store
- Resists chemical contamination, mildew, rot and solar heat
- RF welded seams for longer life
- Severe weather tolerance to -40° F
- Easily handled by one person
- 1.5"/40mm ball valve with female threads
- Large 4"/100 mm diameter fill opening
- Transportable by truck

### Options

- Additional ball valves
- Ground cover to prevent any wear on the tank
- Additional handles or rope holds
- Custom sizes
- Call for pricing on options
