SINGLE LANE TANK TYPE I

- Steel or Aluminum Frame
- 22 oz HPR (High-Performance Rubber)
- Yellow or Red
- 22 oz Vinyl — Red, Yellow, Orange, Black or Blue
- 28 oz Vinyl — Red, Yellow, Orange, Black or Blue
- You can order 22 oz sides with 28 oz floor

Max Strainer can be placed inside bladder and used with Max elbow shown. Option to not have anything mounted to bladder and still use normal Low Flow Strainer through sidewall or over the top.
1. **Easy Lift Handles** — Helps the firefighter to pick up and fold the liner when closing the tank. No zigzag pattern to interfere when using low-level strainers and power jet siphons. Easy Lift Handles can also be placed on the side walls for easy use. Grab handle kits are also available for existing tanks.

2. **Hinge Protectors** — The patented “pinch free” design prevents the firefighter from pinching their hands when opening and closing the folding frames. No loss of frame strength with this design. US Patent #7,938,291 & Canadian Patent #2,624,553

3. **Heavy-Duty Floor Design** — When ordering a 22 oz vinyl or HPR® tank, you can get an optional 28 oz vinyl floor.

4. **Frames Available** — (See page 4)

5. **Liner Fabric Available** — FOL-DA-TANK fabrics have been field tested and used in the most arid climates of the Middle East and cold climates of Alaska. (See page 4)

6. **NFPA Compliant** — p. 1142-33 c.14 Portable Drop Tanks

7. **Lifetime Warranty** — FOL-DA-TANK, LLC provides a limited lifetime warranty for workmanship and material defects on its manufactured products. Send pictures and descriptions of the issue to your FOL-DA-TANK representative for a prompt response.

8. **NFDA Patent** — All Folding Frame Tanks come with patented pinch-free design. *Comes standard with 2 drain sleeves.*

**PORTABLE FOLDING FRAME TANK**

**FEATURES**

- Solid brass grommets. Closely spaced to prevent the liner from sagging
- Liner pick-up grab handles
- Quick release drain sleeve
- 22 oz vinyl or HPR® sides with heavy duty 28 oz vinyl base liners available
- Repair kits available for all liner fabrics

**LINER FABRICS & COLORS**

- 22 oz HPR® — Red or Yellow
  - HPR has superior cold-crack, cut & abrasion resistance without adding weight
- 22 oz Vinyl — Red, Yellow, Orange, Black or Blue
- 28 oz Vinyl — Red, Yellow, Orange or Black

**DIAGRAMS**

Colors shown are approximate
SUPPLY LINE HOLDER

- The Supply Line Holder couples hose securely to any portable water tank frame.

FEATURES
- Added filling source
- Minimizes waste and turbulence
- Frees up manpower for other important duties
- Aluminum casting and Steel bracket
- NST and Storz available (Specify when ordering)

ACCESSORIES

CARRY RACKS

Lightweight Carry Rack can be mounted on a running board or inside a compartment. There are two sizes. Small is for 2.5", and 3" float Dock® strainers and all Low-Flow strainers. Large is for 4", 4.5", 5" and 6" Float Dock® strainer.

BAR SLEEVE CLAMP

The Bar Sleeve Clamp controls water flow between tanks. Part No. BSLC

HOSE STAND

This lightweight aluminum Hose Stand is designed to support a large diameter hose when filling and draining a Self-Supporting Tank or ROL-DA-TANK®. This hard suction hose support stores easily in limited spaces. Part No. HSS

STAGING MAT

- Velcro panels form a 3’x7’ or 6’x10’ mat
- Color coded and labeled
- Ribbed storage area for air cylinders
- Comes standard with green and red panels marked FULL and EMPTY
- Corner mounts available
- Velcro panels form a 3’x7’ or 6’x10’ mat
- Round or square housing designs available for 4” and 5”
- Carry case included

FLANGE MOUNTING PLATE

- Stabilize inner/outer flange set
- Through the wall design
- Reduces pump priming time, cavitation
- Connect two tanks or a low flow strainer
- Retrofit any aluminum or steel frame tank

FEATURES
- Size Part No. 5" Single 10 lbs 3 lbs
- 6" Double 15 lbs 6 lbs

TARPAULINS

- Strong, lightweight 10 oz Vinyl (Red, Yellow, Green, Blue or Black)
- Certified flame retardant
- 12 oz Canvas (Olive Drab Only)
- 22 oz HPR (Red or Yellow)
- 22 oz Vinyl (Black, White, Royal Blue, Red or Yellow)
- Custom sizes available through special order
- Debris bags

GROUND COVER FOR FRAMED TANKS AND SELF-SUPPORTING TANKS

Protects tank bottoms from excessive wear, abrasion and punctures. Tank life is increased. Stays cleaner. Heavy-duty 22 oz red or yellow HPR; 22 oz black, white, royal blue, red or yellow vinyl; or 28 oz orange, red, yellow, or black vinyl. All seams heat sealed for longer life. Available in the same sizes as all FOL-DA-TANK and self-supporting tanks.

DEBRIS CARRIER

SIZES 6’x8’ and 8’x8’ available in canvas, 22 oz vinyl and 22 oz HPR® material

SOFT STRETCHER

The Flexible Stretcher measures 60"x80". The soft stretcher can be used to move small children or adults in an emergency situation. Unlike rigid stretchers the soft stretcher can be easily maneuvered through stairwells, doorways and other confined spaces. Made with (10) heavy-duty web handles and 22 oz vinyl material.

TRIAGE/TREATMENT AREA TARPS

Triage Tarps are not disposable. They are constructed from vinyl-coated nylon for many years of use. The tarps are reinforced at the corners with brass grommets to use as tie-downs or suspension points. The 4 tarps (one each of red, blue, yellow and green) can be folded and stored in our convenient carrying bag. Each tarp is 10’x12’.

- 28 oz Vinyl (Orange, Red, Yellow or Black)
- Custom sizes available through special order
- Debris bags

**ALUMINUM LOW-FLOW STRAINER LOW-LEVEL**

**FEATURES**
- Professionally designed and engineered for maximum pumping capacity
- Al-mag castings — proven to be the toughest in the industry
- The Low-Flow™ Low-Level will perform at maximum pumping capacity down to a water level of 1.5”-3” depending on your setup area
- Flow Rate — Tested with 6” Low-Flow™
- Low-Level rate is 1500-2000 GPM. The flow rates may vary due to the design of the pump and the setup area
- Use of a male and female SST flange mounted on the side wall of your FOL-DA-TANK will eliminate the lifting factor when pumping from the side of the tank
- Long handle swivels with standard NH or NPSH threads
- Surface turbulence will not affect this strainer
- Optional 1.5” water transfer device available in sizes 4”-6” (Must specify when ordering)
- Each unit is fully guaranteed
- The Low-Flow™ Low-Level is easily stored in truck compartments and can be reattached to hard suction hose (NFPA 1142 compliant)

**POWER JET SIPHON**

The Power Jet Siphon is designed for use with two or more FOL-DA-TANKs. The siphon connects to a hard suction hose and assists the transfer of water from one tank to another. This keeps the main tank full of water for drafting as the secondary tank is refilled. In-Line Power Jet Siphons can also be used in ponds, creeks or lakes to help transfer water to tankers and pumper trucks. The In-Line Power Jet Siphon will also assist you with lift from a pond or creek that is lower than the level of the pumper truck. When using the In-Line Power Jet Siphon water or air can be used in the pumping process. Special attachments are available when using air. The construction features include: durable al-mag alloy, aircraft quality tubing and 1.5” female assist by 4”-6” discharge couplings. Standard threads are NST with other threads available. STORZ and CAM fittings are available upon request. (NFPA 1142 compliant)

**IN-LINE POWER JET SIPHON**

The In-Line Power Jet Siphon is designed for use with two or more FOL-DA-TANKs. When the tanks are not close together, an In-Line Power Jet Siphon attached to two hard suction hoses assists water transfer from one tank to another. This keeps the main tank full of water for drafting as the secondary tank is refilled. In-Line Power Jet Siphons can also be used in ponds, creeks or lakes to help transfer water to tankers and pumper trucks. The In-Line Power Jet Siphon will also assist you with lift from a pond or creek that is lower than the level of the pumper truck. When using the In-Line Power Jet Siphon water or air can be used in the pumping process. Special attachments are available when using air. The construction features include: durable al-mag alloy, aircraft quality tubing and 1.5” female assist by 4”-6” discharge couplings. Standard threads are NST with other threads available. STORZ and CAM fittings are available upon request. (NFPA 1142 compliant)

**SELF-LEVELING FLOAT DOCK STRAINER**

The Float Dock® Strainer is a valuable piece of equipment that can save the day in many firefighting situations. Float Dock® lets you use the water in farm ponds or streams, both shallow and deep, and with a FOL-DA-TANK®. Because it operates below scum and debris and above sand and muck, it screens out the materials that wear out impellers, packing and bearings. Since Float Dock® strainers are self-leveling, there are no whirlpools or suction loss. Each unit is fully guaranteed. (NFPA 1142 compliant)

**FEATURES**
- Professionally designed and engineered for maximum pumping capacity
- Polyethylene molded float with molded in carry handle (handle can be used for tie-off and retrieval)
- No need for a vortex plate, float prevents any whirlpooling
- Self-leveling
- Al-mag castings - Proven to be the toughest in the industry
- Long handle swivels with standard NH or NPSH threads
- 20-30% more open area at the intake
- Detach strainer and use separately as a “Box Strainer”
- All Float Dock® are available in all aluminum construction up to 8”
- Float Dock® drafts in as little as 5”/13 cm of water
- Optional riser will convert the strainer box into a low-level strainer
- 6” is recommended for pump rated at 1500-2000 GPM

**STRAINER WITH RISER**

- Floating strainer
- Low-level strainer
- Box strainer
- Part No. FDSR

**DEEP DRAFT**

- Note how Float Dock drafts in as little as 5”/13cm depth without any whirlpooling or loss of suction.
- Right photo shown with riser

**SHALLOW DRAFT**

- Note how Float Dock drafts in as little as 5”/13cm depth without any whirlpooling or loss of suction.
- Right photo shown with riser
The self-supporting frameless portable water tanks have been designed to meet the most stringent requirements of rural/urban fire fighting. Problems with inadequate or unusable supplies of water are eliminated by the use of open top self-supporting portable water tanks. In remote areas the self-supporting tanks are designed for standby water containment and water shuttling situations and they provide a continuous portable water supply. In remote areas, the SST may be filled by pumping water from a natural water source, such as a stream or creek, with a small gas-operated pump. As the self-supporting tank begins to fill with water, its unique design allows it to become self-supporting automatically. The SST does not require any additional supporting framework, assembly or frame installation. When no longer in use, the SST may be quickly drained through a fitting on the side. The SST is totally collapsible and easily stored in its own compact storage bag. It can be stored in the side or back of a truck, or in the cargo compartment of a helicopter.

**FEATURES**
- Easy one-man setup
- Ethafoam collar - No need to inflate
- All self-supporting tanks are supplied with one threaded flange coupling installed.
  - Sizes 1.5”-6”
- NST or NPSH, male or female (Specify Choice)
- Any number and size of hose connections can be added for bottom drafting
- All seams welded for longer life (See Warranty)
- Heavy-duty vinyl
- Easily repairable
- Storage bag included

**APPLICATIONS**
- Fire Fighting, Water Relay, Water Storage, Mixing Tank and Hazardous Wastes

**ALUMINUM THREADED FLANGES**
- Standard NST Threads – Male or Female

ACCESSORIES
- GROUND COVERS
- TOP COVER
- STORAGE BAG
- PATCH KITS
- IMPACT PAD
The Quick Assemble DBL-HI® can be transported by helicopter or truck into remote areas for easy setup. The DBL-HI® frame is constructed from aircraft-quality aluminum with al-mag snap button connections. The liner is suspended from heavy-duty tension straps with quick release snap clips. The liner design relieves the pressure on the frame and adapts to the contour of the setup site. All parts are stored in a convenient storage bag for easy transport. (GSA Approved)

**FEATURES**
- Sets up in seconds
- No assembly required
- Keep contaminated liquids contained
- Aluminum frames available

**POTABLE WATER TANK**

**APPLICATIONS**
- Drinking Water, Clean Shower Water, Rainwater Harvesting and Livestock Troughs

**CHEMICAL RESISTANT TANK**

**APPLICATIONS**
- Portable Chemical and Liquid Storage

**GRAY WATER TANK**

**APPLICATIONS**
- Firefighting in remote areas, Brush Firefighting, Construction Sites and Decon Waste Storage

**FEATURES**
- Potable water fabric NSF/ANSI 61 standard
- Compact – easy to store
- Resists chemical contamination, mildew, rot and solar heat
- RF welded seams for longer life
- Severe weather tolerance to -40° F
- Fills and empties in minutes by pump or gravity flow
- Easily handled by one man
- 1.5”/40mm ball valve with female threads
- Large 4”/100 mm diameter fill opening
- Transportable by truck
- XR-5 used for chemical resistant bladders

**APPLICATIONS**
- Filling Back Pack Tanks, Potable Water, Foam Retardants, Extinguishing Duff Embers, Small/Light Pumps and Gravity Feed Reservoirs

**CHEMICAL RESISTANT TANK**

**APPLICATIONS**
- Portable Chemical and Liquid Storage

**FEATURES**
- Self-supporting
- Closed top—prevents contamination
- Lightweight
- Easily transportable
- Potable water [special order]

**APPLICATIONS**
- Filling Back Pack Tanks, Potable Water, Foam Retardants, Extinguishing Duff Embers, Small/Light Pumps and Gravity Feed Reservoirs

**PILLLOW & BLADDER SERIES**

**FEATURES**
- Optional ball valves 1.5”-2.0”
- Heavy-duty vinyl
- Optional fabrics: NSF/FDA or chemical resistant
- Additional flange can be installed on tank

**APPLICATIONS**
- Filling Back Pack Tanks, Potable Water, Foam Retardants, Extinguishing Duff Embers, Small/Light Pumps and Gravity Feed Reservoirs

**CHEMICAL RESISTANT TANK**

**APPLICATIONS**
- Portable Chemical and Liquid Storage

**FEATURES**

FOAM WALLS

**TYPE GF**

Containment basins are open top containment units for temporary storage of oil or contaminated liquids. The containment basins also serve as temporary dikes around tanks. They are portable and can be set up in the field in minutes.

**FEATURES**
- Foam walls
- Vinyl
- Lightweight
- Portable

**APPLICATIONS**
- Equipment Wash-down, Truck/Vehicle Wash-down, Haz/Mat Decontamination,
- Drip Pads, Overturned Truck Containment,
- Temporary Holding of Contaminants,
- Sorbents and Other Materials

Puncture-resistant Ground Covers are recommended. Any size available in chemical resistant or standard vinyl.

AIR TUBE SIDES

**TYPE E**

Convenient portable containment system for quick and temporary containment of hazardous materials. The portable inflatable dam is also ideal for cleaning and decontaminating all types of equipment. Custom sizes available. All units are shipped in a heavy-duty storage bag with lifting straps.
